Professional Experience

Backend Developer Intern — ZeTheta Algorithms Pvt. Ltd.

May 2026 – Jul 2026

Remote

- Designed and developed scalable backend services, REST APIs, and database schemas with a focus on reliability, performance, and maintainability.
- Implemented asynchronous processing, retry mechanisms, authentication, validation, and fault-tolerant workflows to build secure and resilient backend systems.
- Applied distributed systems principles including event-driven architecture, background job processing, state management, monitoring, and performance optimization to solve real-world engineering problems.

Technical Skills

Languages: JavaScript, TypeScript, Java, SQL, HTML5, CSS3

Backend: Node, Express, RESTful APIs, JWT, Web Sockets

Frontend: React.js, Redux, Bootstrap, Tailwind CSS

Databases: PostgreSQL, MongoDB, Redis

DevOps: Docker, Kubernetes, CI/CD, Git, GitHub

Projects

GlobeHaven – Hotel Booking System — [GitHub](#)

Aug 2025 – Nov 2025

Node, Express, Passport, Razorpay, Mapbox API, Cloudinary, MongoDB, Redis, HTML, CSS, EJS, Bootstrap

- Built a full-stack hotel booking platform with secure authentication, interactive maps, and property management, enabling users to discover 1,000+ listings with 40% cheaper and 30% faster property search using location-based and filter-based discovery.
- Engineered 15+ scalable RESTful APIs using Node.js, Express.js, supporting 10,000+ property records with 99.9% data integrity, and protected CRUD operations.
- Integrated Cloudinary, Mapbox, and Razorpay, reducing image storage overhead by 70%, enabling secure 100% online payment support, and delivering a responsive experience with <2 s page load time across devices.

VideoConf – Video Conferencing Web Application — [GitHub](#)

Jan 2026 – Mar 2026

Node, Express, React.js, JavaScript, MongoDB, Material UI, JWT

- Developed a real-time video conferencing platform supporting 100+ concurrent users, reducing meeting setup time by 95% with one-click room creation and sharing.
- Implemented live video, audio, screen sharing, and live chat, achieving <300 ms latency and 99.9% connection reliability for seamless collaboration improving overall user satisfaction with a 90%+ successful meeting completion rate.
- Designed a peer-to-peer architecture that reduced server bandwidth by up to 70% and enabled 99.9% session availability during testing.

Education

B.Tech in Information Technology

2023 – 2027

University of Kalyani, Nadia, West Bengal

CGPA: 7.5 / 10.0

Certifications

- Certified Software Engineer Intern – HackerRank (July 2026)
- Certified Full Stack Developer – Apna College (June 2025)
